

To Whom It May Concern

I am writing to provide information about the grading system and weighting procedure used in our school of Electrical and Computer Engineering at Mekelle University. Our grading system is based on a 4.0 scale, with the following letter grades and corresponding grade point averages (GPAs):

Bachelor's program*	Master's program
A: 4.0 B: 3.0 C, C-: 2.0 D: 1.0 F: 0.0	A+: 4.0 A: 4.0 A-: 3.75 B+: 3.5 B: 3.0 B-: 2.75 C+: 2.5 C: 2.0 C-: 1.75 D+: 1.5 D: 1.0 D-: 0.75 F: 0.0

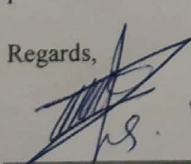

*Note: Plus/minus grades in Bachelor's program don't have value

Our weighting procedure takes into account the number of credit hours for each course. Each course is assigned a certain number of credit hours based on the amount of time and effort required to complete the course. The weighting procedure is as follows:

- Multiply the grade point average (GPA) for each course by the number of credit hours for that course.
- Add up the weighted GPAs for all courses.
- Divide the total weighted GPAs by the total number of credit hours.

This procedure ensures that courses with more credit hours have a greater impact on a student's overall GPA. We believe that our grading system and weighting procedure provide a fair and accurate assessment of a student's academic performance. If you have any further questions or would like more information, please do not hesitate to contact us.

Regards,
